

BH Loop Tracer (Hysteresisgraph) for hard magnetic material

Description: Used to characterize hard magnetic materials. Invaluable for academic studies and magnet designs, manufacturing. Aids users of the magnetic materials.

Facility Creation Date: January 2018

Report: Capacity to plot complete hysteresis loop along with the recoil line and thus provides values of key magnetic parameters like remanence B_r , coercivity H_{cB} , H_{cJ} max energy product BH_{max} , H_{knee} , μ_{Recoil} , etc.
