TENDER NOTICE

Sub: Procurement of raw materials & standard items, manufacture, inspection, assembly, shop-testing, packing, delivery, installation & commissioning of Rod Cutting Gadget at site

- 1.0 Sealed quotation is invited, for and on behalf of the President of India, for the above job as per the description and scope of work given below.
- 1.1 Tender offer is to be submitted in two parts viz. **Part-A** (Techno-commercial Bid) and **Part-B** (Price Bid).

In **Part-A** (Technical Bid) bidder must attach following documents;

- a) PAN No, GST certificate / Number.
- b) List of available plant & machinery.
- c) List of technical manpower along with organizational structure.
- d) Proof of having satisfactorily completed similar works.
- e) The bidder shall answer the questionnaire given in **Annexure-1** attached to be qualified for opening of the **Part-B (price bid)**.

In **Part-B** (Price Bid), the quotation shall be in the format of attached schedule-B and shall show the basic cost and GST separately, if applicable.

- 1.2 Bidders are required to submit in separate sealed envelopes, containing and indicating the following on outside:

First Envelope	Tender no.	Part-A (Technical Bid)
Second Envelope	Tender no.	Part-B (Price Bid)

The technical bid and the financial bid should be sealed by the bidder in separate covers duly superscribed and both these sealed covers are to be put in a bigger cover which should be sealed and duly superscribed with the name of the work, name and address of bidder, tender notice no. and due date.

- 1.3 Sealed and superscribed Tenders as mentioned above in 1.1 shall be sent to and will be received up to **15.00 hrs. of 25th March 2022 only**, at the address given below. The quotation shall be sent through Indian postal services only by registered post / speed post. Quotation delivered by person or through courier will not be accepted and not considered for bidding process.

To,
ROD Office, Dhruba
Kind Attn: Shri M K Ojha, SO/F
ROD/ CIRUS
BARC, Trombay
Mumbai-40085

- 1.4 After opening of Part-A of the tender, bidders shall be evaluated, for their techno-commercial capability to carry out the work based on;
- Technical capabilities in regard to tendered work
 - Organizational structure.
 - Available resources, skilled man power and previous experience of similar jobs.
 - Quality and safety consciousness.
 - Adherence to time schedule for the completed works.

Those who do not satisfy the conditions in **Part-A** shall not be considered for **Part-B**. Part-B (Price Bid) of tender will be opened at a later date only for the successful bidders who are qualified through technical evaluation.

- 1.5 The acceptance of tender will rest with Director, Reactor Group, BARC on behalf of The President of India who does not bind himself to accept the lowest tender and reserves to himself the authority to reject an or all of the tenders received, without assignment of any reason.
- 1.6 In the event of any conflict between or within the various sections of this specification or in case of any doubt, decision of the indenter shall be final.
- 1.7 The contractor is specifically requested to visit the site and familiarize himself with the location and facilities available for this work and obtain any other information which may influence or affect this tender, before submitting quotation.
- 1.8 The bidder shall quote clearly break up of basic price and taxes.
- 1.9 The quotation shall be given on vendor's letter head and properly signed in the format given in the Schedule of work. The vendor shall provide the PAN no. and GST no. along with quotation.
- 1.10 No advance or part payment is admissible.
- 1.11 The quality of workmanship shall conform to high standards and strictly as per specifications and drawings provided.
- 1.12 The contractor shall have experience in execution of similar jobs. Your quotation shall accompany suitable documents regarding this.

2.0 SCOPE OF WORK:

- 2.1 The job includes procurement of all the raw materials and standard items in accordance with requirements given in the specification and drawings in the annexures. This includes procurement of carbon steel & stainless steel hollow rectangular sections, carbon steel & stainless steel raw materials (like plates, bars, pipes, forgings etc.), Aluminum plates & pipes, procurement of hydraulic cutter, water hydraulic power pack, electric motor, pneumatic motor, cable drag chain, hydraulic, pneumatic & electrical control components (like directional & flow control valves, relief valves, control panel, hoses, tubes, filters, limit switches etc.), submission of test certificates

of all raw materials and bought out components.

- 2.2 Packing and safe delivery at BARC along with the necessary inspection & testing reports and installation at site.
- 2.3 Manufacturing, assembly, shop testing, delivery and installation of the complete assembly of Rod Cutting Gadget at site as per list of drawings given in Annexure-3. The drawings are attached in the PDF file with this tender notice.
- 2.4 Preparation of inspection report of all the components at appropriate stage during manufacturing.
- 2.5 Obtain purchaser's approval for any deviation in design / material with necessary reason for the same.
- 2.6 Offering the component or assemblies for inspection to purchaser's representative.
- 2.7 Carry out necessary modification or improvements until satisfactory performance is achieved.
- 2.8 It is quite likely that certain modifications of minor nature may have to be done during the period of manufacture of these assemblies to suit the assembly and functional requirements. The Supplier shall accommodate such minor changes as and when required during the manufacture without any additional charge to the purchaser. Any modification required for fabrication, machining, assembly, handling, testing etc. shall be done only with prior approval of the purchaser.
- 2.9 The General Assembly (GA) and Detail Drawings (DDs) of the set-ups are supplied with this tender specification. The items are to be supplied by the supplier as per specifications and list of drawings provided in the **Annexure-2 & 3**.

3.0 WORK COMPLETION PERIOD:

Six months from the date of work order.

4.0 MATERIALS AND WORKMANSHIP

- 4.1 No material will be supplied by indenter.
- 4.2 Power supply, Compressed air and service water are available at work site.

4.3 Workmanship:

Workmanship shall be of first class, high grade quality and in accordance with the best approved method.

5.0 PENALTY:

Any delay which is attributable to the contractor is liable for penalty @ $\frac{1}{2}\%$ per week (max 10%) to be imposed on the contractor.

6.0 PAYMENT:

- 6.1 Payment shall be made only on satisfactory completion of the work and on production of bill, advance stamped receipt and guaranty/warranty certificate. Advance/ part payment or against delivery cannot be made. Proposed payment terms by the tenderer cannot be accepted.
- 6.2 An undertaking shall be submitted that the GST has been promptly deposited with the authorities.
- 6.3 ITR undertaking and ITR acknowledgement receipt for the last two years shall be submitted.

7.0 DEDUCTION OF TAXES AND SURCHARGES:

Income tax @2.0 % and GST TDS @2% will be deducted from the bill.

8.0 Safety:

- i. All the persons working at site during assembly and installation at site shall be physically and mentally fit.
- ii. All applicable industrial & safety precautions shall be taken by the contractor in respect of their personnel working at site.
- iii. Contractor personnel shall also abide by the radiation safety precautions as directed by the Health physicist of the site.
- iv. All workers, supervisors & engineers of the contractor shall wear necessary protective clothing, safety belts with harness, helmets & canvas/safety shoes properly laced & follow the safety requirements strictly, while working at site.
- v. The personal protective equipment to contract workers, supervisors & engineers shall be supplied by the contractor at his cost.
- vi. The contractor & his persons shall strictly observe all security and safety regulations prevailing at the site.
- vii. Safe industrial practices are to be followed for use of portable ladders & step ladders by Contractor & his team, wherever applicable.
- viii. All workers should be insured at the cost of the contractor for risk of working at BARC & no claim will be payable by BARC.
- ix. The contractor shall arrange medical certificates of their personnel from a registered medical practitioner certifying that the personnel are medically fit to work in a radiation area.
- x. Above work shall be carried out with strict adherence to safe work practice. BARC shall not be responsible for any damage, injury, death etc of any contractor's personnel under any circumstances. No compensation claim shall be admitted in this regard.

9.0 Security:

- a) Security instructions should be strictly adhered to.
- b) **The contractor shall arrange Police verification certificates for the group of persons engaged by him for the above work as per the existing procedure at BARC.**
- c) All the personnel employed by the contractor will follow strict instruction given by RHC of reactor complex.

10.0 CONFIDENTIALITY CLAUSES.

(i) Confidentiality:

No party shall disclose any information to any third party concerning the matters under this contract generally. In particular, any information identified as "**Proprietary**" in nature by the disclosing party shall be kept strictly confidential by the receiving party and shall not be disclosed to any third party without the prior written consent of the original disclosing party.

This clause shall apply to the sub-contractors, consultants, advisers or the employees engaged by a party with equal force.

(ii) "Restricted information" categories under section 18 of the Atomic Energy Act, 1962 and "Official Secrets" under Section 5 of the Official Secrets Act, 1923: -

Any contravention of the above-mentioned provisions by any contractor, sub-contractor, consultant, adviser or the employees of a contractor will invite penal consequences under the aforesaid legislation.

(iii) **Prohibition against use of BARC's name without permission for publicity purposes: -**

The contractor or sub-contractor, consultant, adviser or the employees engaged by the contractor shall not use BARC's name for any publicity purpose through any public media like Press, Radio, T.V. or Internet without the prior written approval of BARC.

11.0 General:

- i. The quotation shall be given on the vendors letter head and properly signed.
- ii. The vendor shall provide PAN no. and GSTN no. along with the quotation.
- iii. **The desirous bidders may contact M K Ojha, Decommissioning Engr. on Tel no. 25596250 for any clarification.**
- iv. The bidder must visit the site to assess the job clearly and specifically before quoting their offer. He may contact one day in advance. The bidders who will quote without visiting the site are liable to be rejected.
- v. We reserve the right to terminate the contract at any stage of execution of the contract without assigning any reason.
- vi. Please indicate whether any of your relatives are employed in BARC or you or any of your employees were employed in BARC or any other units of DAE.

Annexure-1

<u>Questionnaire to be filled and submitted for technical evaluation</u>		
	Mention the following details about your selection of hydraulic shear cutter for cutting 50 mm OD hollow Aluminium tubes having cross-sectional area of about 660 mm²	
	Dimensions of cutter (L,W,H) in mm	
	Bore diameter of cylinder, mm	
	Can it cut ASTM-B-221 Type 1060 Aluminium pipes of OD 50 mm and cross-sectional area of about 660 mm ² ?	
	Pressure required for cutting, bar	
	Make & Model no.	
	Vendor details	
2.	Mention the following details about your selection of compact water hydraulic power pack for above cutter	
	Overall dimensions (L,W,H)	
	Max. Pressure (bar)	
	Max. Flow (LPM)	
	Fitted with castor wheels to move on floor?	
	Make & Model no.	
	Vendor details	
3.	Mention the following details about your selection of cutter swivel pneumatic motor	
	Compatible to underwater operation at 8 m water head?	
	Speed (RPM)	
	Torque (N-m)	
	Equipped with "power-off activated" type brake?	
	Braking Torque (N-m)	
	Make & model no.	
	Vendor details	
4.	Mention the following details about your selection of cable drag chain?	

	Is the selected chain vertical standing type?	
	What is the maximum height to which chain loop can be raised vertically?	
	Size of chain element to accommodate 6 nos. of $\frac{1}{4}$ inch hoses (Length & Width of cross section)	
	Minimum loop diameter, mm	
	Chain material	
	Make & model no.	
	Vendor details	
5.	Mention the following details about your experience in constructing telescopic mast?	
	For a stainless steel square tube telescopic mast of 1 stationary and 3 moving booms having net stroke of 4m and weight to be handled about 50 kg, what minimum cross sectional dimensions of outer most mast tube will you choose?	
	Furnish details of past work orders for boom mast manufacturing	
	Vendor details for procuring hollow stainless steel mast tubes

Government of India
Bhabha Atomic Research Centre
Reactor Operation Division

Specification for

**Procurement of raw materials & standard items, manufacture, inspection,
assembly, shop-testing, packing, delivery at site, installation & commissioning**

OF

Rod Cutting Gadget

1.0 Introduction:

This tender document is for the supply of

S No.	Item (Drawing No.)	Quantity
1	Rod Cutting Gadget Assembly	1

The job includes procurement of raw materials, and standard components, manufacture, inspection, assembly, shop testing, packing, delivery at RO Zonal stores, BARC, Trombay, Mumbai – 400085 and installation of above items at site.

The General Assembly (GA) and Detail Drawings (DDs) of the set-ups are supplied with this tender specification. The items are to be supplied by the supplier as per specifications and drawings.

The specification covers requirements of different machined components, raw materials, standard items etc. In general, the components require skill in machining, fabrication, non-destructive examination, assembly of components, shop testing, installation & commissioning. It is desirable that supplier shall have past experience to execute such kind of jobs.

2.0 Scope of the work for Supplier:

The scope of the work for supplier includes procurement of raw materials, procurement of standard components, manufacturing, assembly, inspection, testing, packing and delivery at site of above-mentioned items in their respective quantity at RO Zonal stores, BARC, Trombay, Mumbai – 400085 as detailed below: -

1. Procurement of all the raw materials and standard items in accordance with requirements given in this specification and drawings. This includes procurement of carbon steel & stainless steel hollow rectangular sections, carbon steel & stainless steel raw materials (like plates, bars, pipes, forgings etc.), Aluminum plates & pipes, procurement of hydraulic cutter, water hydraulic power pack, electric motor, pneumatic motor, cable drag chain, hydraulic, pneumatic & electrical control components (like directional & flow control valves, relief valves, control panel, hoses, tubes, filters, limit switches etc.), submission of test certificates of all raw materials and bought out components.
2. Manufacturing, assembly, shop testing, delivery and installation of the complete assembly of Rod Cutting Gadget at site as per list of drawings given in **Annexure-3**. The drawings are attached in the PDF file with this tender notice.
3. Preparation of inspection report of all the components at appropriate stage during manufacturing.
4. Obtain purchaser's approval for any deviation in design / material with necessary reason for the same.

5. Offering the component or assemblies for inspection to purchaser's representative.
6. Carry out necessary modification or improvements until satisfactory performance is achieved.
7. It is quite likely that certain modifications of minor nature may have to be done during the period of manufacture of these assemblies to suit the assembly and functional requirements. The Supplier shall accommodate such minor changes as and when required during the manufacture without any additional charge to the purchaser. Any modification required for fabrication, machining, assembly, handling, testing etc. shall be done only with prior approval of the purchaser.
8. Packing and safe delivery at BARC along with the necessary inspection & testing reports and installation at site.

3.0 Free Issue Material

No free issue material will be supplied.

4.0 Notes to bidder

- i) Entire job including manufacturing, inspection, shop testing, packing & delivery shall be completed within **Six months** from the date of release of purchase order.
- ii) Drawings of seal test set-up are enclosed with the tender and a list of drawings is given in **Annexure-3**.
- iii) The bidder shall identify the source of supply of raw materials and standard items before sending the quotations. This shall be clearly indicated in the quotation along with details of make & cost of individual bought-out components. A detailed break-up of cost in regard to raw materials, standard items, manufacturing, testing, supply, installation & commissioning shall be included in the quotation.
- iv) Jobs to be subcontracted by the supplier, shall be clearly indicated in his quotation. The name of subcontractor along with its technical capability shall also be specified in quotation.
- v) The raw materials and standard / proprietary items shall meet requirements of relevant drawings. The supplier shall produce mill test certificates for all raw materials and get them approved by the purchaser.
- vi) As a proof of ability, the Bidder shall submit a list of similar works executed by him. Bidder shall also submit a list of machine tools and equipment including; precision machining, and inspection equipment / metrology available with him. The list shall also indicate accuracies achievable by them.
- vii) Any deviation from the requirements indicated in this specification, drawings, annexure etc. shall be brought out clearly by the Bidder in his quotation.

- viii) End user certificate for any bought-out item will not be provided by purchaser. Post supply inspection of items will not be allowed by purchaser.

5.0 General supply conditions for supplier

- i) All work covered by this Tender Document including the items procured by the supplier shall be subjected to the Quality Surveillance by the purchaser or his authorized representative. The supplier shall produce an inspection plan to purchaser's satisfaction and notify him the imminent checkpoints.
- ii) The supplier shall submit various technical documents namely raw material mill test certificates, dimensional inspection reports, functional testing reports, design concession requests etc. These reports will be approved by the purchaser. A manufacturing history docket shall be submitted by the supplier in both hardcopy & softcopy format.
- iii) The checking and approval of the documents shall not relieve the supplier in any manner from full responsibility for ensuring correct interpretation of design drawings and specifications and for the completeness and accuracy of the shop drawings and manufacturing documents and relevant specifications.
- iv) Supplier is required to have infrastructure and practice for recording/documenting all inspection records, History Dockets, design deviations, test reports etc. in a systematic manner.

6.0 Technical specifications

6.1. Applicable specifications and drawings:

Latest issues of following specifications, drawings and bills of material in effect at the time of manufacture shall form a part of this specification to the extent specified herein. In the event that certain provisions of the specifications listed below conflict with the requirements of this specification, the requirements of this specification shall govern.

i) Specifications

ASTM-A-240	Standard Specification for Chromium and Chromium-Nickel Stainless Steel Plate, Sheet and Strip for Pressure Vessels and for General Applications
ASTM-A-276	Standard Specification for Stainless Steel Bars and Shapes
ASTM-A-500	Standard Specification for Cold-Formed Welded and Seamless Carbon Steel Structural Tubing in Rounds and Shapes
ASTM-A-193	Standard Specification for Alloy-Steel and Stainless Steel Bolting for High Temperature or High Pressure Service and Other Special Purpose Applications
ASTM-A-194	Standard Specification for Carbon and Alloy Steel Nuts for Bolts for High Pressure or High Temperature Service, or Both

ASTM-B-150	Standard Specification for Aluminum Bronze Rod, Bar, and Shapes
ASTM-B-209	Standard Specification for Aluminum and Aluminum-Alloy Sheet and Plate
ASTM-B-221	Standard Specification for Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wire, Profiles, and Tubes
IS: 2062	Hot rolled medium and high tensile structural steel — specification

ii) Drawings

List of drawings for manufacturing of components and assembly of Rod Cutting Gadget are given in **Annexure-3**. Requirements specified on these drawings shall govern manufacture and supply of the equipment.

6.2. Materials, Process and Workmanship

i) Materials

All the raw materials required for the manufacturing of Rod Cutting Gadget shall be procured by the supplier. Mill test certificates shall be provided for all raw materials. Materials, proprietary components and fasteners required for jigs, fixtures, gauges, supports, hangers, clamps etc. to facilitate manufacture, inspection, shop testing, packaging etc. of assemblies shall be provided by the supplier.

ii) Process and Workmanship

The manufacturing process and workmanship shall be consistent with high grade industrial practice and shall be adequate to consistently achieve the accuracy and surface finish called up in the drawings and this specification.

Immediately after all machining operations, the components shall be thoroughly cleaned to remove all traces of cutting oils, tool materials etc. After cleaning, the components shall be applied with approved rust preventives (for carbon steel components) and stored in heat sealed polythene bags till they are taken up for inspection and assembly.

6.3. Manufacturing requirements

The above mentioned Rod Cutting Gadget shall be manufactured, tested, assembled and delivered by the supplier site strictly in accordance with the approved drawings and specification to the entire satisfaction of purchaser.

6.4. Inspection and Tests

i) Dimensional Inspection:

The Supplier shall inspect the following and keep a proper record of the same:

- a) Dimensions, surface finish, geometric features, fit and alignment of all components.

- b) Visual inspection of all the components to ensure absence of burrs, sharp corners, plating chip off etc., and for workmanship and cleanliness.
- c) Completeness and conformance of all components to the requirements specified in drawings and this specification.
- d) Inspection to ensure that no feature on the component other than those specified in the drawing is made.

ii) **Shop Testing:**

Supplier shall perform functional testing of complete Rod Cutting Gadget Assembly and demonstrate cutting & lifting operations on pipes in random orientations as specified by the purchaser.

iii) **Inspection and Test Failures**

If any component fails to meet any inspection or functional requirement of this specification and if the Supplier intends to offer the equipment or the part for acceptance, either in failed, reworked or repaired condition, then, he shall notify the purchaser or his authorized representative of his intentions. For this purpose, the Supplier shall submit a 'Design Concession Request' (DCR) with full particulars and descriptions of the deviations and proposed method of rectification. The DCR shall be submitted to the purchaser for approval. The rectification or use of the component, by the Supplier shall be taken up only after the approval of the DCR by the purchaser. At the discretion of the purchaser, the failed equipment or part may be accepted, as deviated part or required to be reworked, repaired, re-inspected and / or re-tested or totally rejected.

6.5. Assembly of Rod Cutting Gadget

Rod cutting gadget assembly is required for cutting of aluminium rods inside a water filled bay & disposing the cut rods in storage bins. The bay has horizontal dimensions of 3m x 4m and a depth of 6m. The rods are in the form of coaxial aluminium tubes having outside diameter of outer-most tube as 50 mm. The rods are randomly oriented inside the bay. The cutting operation is to be accomplished by a water hydraulic operated shear cutter. Vertical travel of cutter, which is about 3.8 m, is performed by a telescopic mast and horizontal travel by a carriage-trolley system. The cutter can be swivelled in a vertical plane and rotated about a vertical axis. The cutter is required to be operated by water hydraulic pressure sufficient to cut hollow aluminium pipe of outer diameter 50 mm & cross-sectional area about 660 mm². The mast operation and cutter vertical swivel are required to be motorised. Carriage-trolley motion and cutter rotation about vertical axis are manual. Hoses & cables traveling along with the cutter due to mast motion shall be manoeuvred by a suitable mechanism. Pressurizing system for water hydraulically operated shear cutter shall be mounted on a compact trolley with wheels so that it can be moved along with carriage on floor. The Motors and cutter shall be operated from a control panel traversing along with the carriage-trolley. The control panel should be equipped with suitable directional & flow control valves, PRVs, electrical switches & supplies to facilitate control of electric motor, hydraulic cutter & air motor from top of the

bay by the operator. Overrun of trolley and mast shall be prevented by limit switches. The complete system shall have minimum number of sub-assemblies for final integration at site so that the final assembly is simple and quick. A schematic of the system is shown in **Fig.1**.

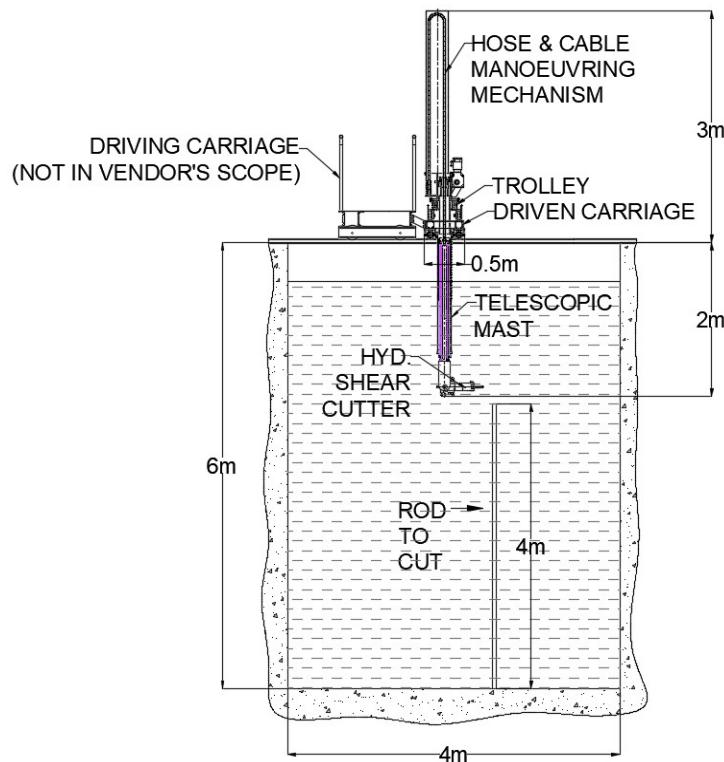

FIG. 1 – Schematic of Rod Cutting Gadget Assembly

6.6. Shop Testing of Rod Cutting Gadget

After manufacturing, the system shall be assembled and functional testing of each subassembly shall be demonstrated. Thereafter cutting operations in actual working conditions shall be simulated on hollow aluminium tubes made from ASTM-B-221 Type 1060 material. The pipes shall have OD 50 mm & cross sectional area about 700 mm^2 (min.). During cutting pipes shall be laid in random orientations specified by purchaser. For shop testing the carriage should be rigidly fixed on a structure at a height of 6m from ground. Trolley with mast shall be assembled over the carriage. Cutting operation on pipes shall be demonstrated through sequential motions of trolley and mast. Pipes shall be placed in water filled drum and cutting shall be done by immersing the cutter in water. All operations shall be carried out from a platform near the carriage. The following is a provisional list of aspects to be checked:

- Carriage:** It shall be rigidly fixed on a structure at a height of 6 m from floor. It shall be properly levelled to provide a horizontal rolling surface for trolley. Carriage need not be travelled during testing.

- b) Trolley: Horizontal movement of trolley over carriage shall be demonstrated with cutter in free condition as well as in the condition of cutter gripping & lifting a cut pipe. Locking of Trolley at any desired position on carriage shall be shown.
- c) Telescopic Mast: Vertical movement of telescopic mast (full advance & retract) and overrun protection shall be shown. Rotation of mast about vertical axis shall be shown. Manoeuvring of cables and hoses by drag chain shall be shown.
- d) Cutter: Rotation of cutter by swivel motor shall be shown. Cutting & gripping operation by cutter of 50 mm OD & 660 mm² (min.) cross sectional area ASTM-B-221 Type 1060 Aluminium pipes shall be shown with cutter immersed in water in a drum. Braking capacity of swivel motor shall be shown for cutter gripping 1m length of pipe.

6.7. Acceptance criteria :

The following requirement shall be met for acceptance of the components.

1. Smooth motion of trolley on rails over carriage shall be demonstrated end to end
2. Smooth $\pm 180^\circ$ rotation of mast about vertical axis shall be demonstrated
3. Smooth and vertical motion of telescopic mast in its full stroke shall be demonstrated.
4. Smooth $\pm 90^\circ$ rotation of cutter on its axis shall be demonstrated
5. Under water cutting of pipes in vertical, horizontal and inclined orientations by hydraulic shear cutter shall be demonstrated
6. Lifting of cut pipes on floor by cutter and dropping them into storage bins shall be demonstrated.
7. During motion of the system no fouling of cables and hoses shall be observed.
8. No malfunction of hose/cable manoeuvring mechanism shall be observed.
9. No malfunction of cutter, motors, control valves, pressurizing system etc. shall be observed.
10. Cutter shall be able to rigidly hold and lift 1m length of pipe with swivel motor supply switched off and only braking line supply on.
11. No malfunction of limit switches to prevent over-travel of motorised systems shall be observed.
12. All components shall meet dimensional requirement as per drawing.
13. During pressurisation of fluid actuators, no leakage shall be observed.
14. After testing components shall be disassembled and visually inspected for any distortions/dents etc. These shall not be observed on components.

All of the above operations shall be demonstrated multiple times up to the satisfaction of the purchaser.

6.8 **Installation at Site:** After delivery of all components of the rod cutting gadget at ROZ stores, the same shall be assembled at work site. All components shall meet the acceptance criteria as listed below in item # 6.9.

6.9 **Acceptance criteria at work site:**

The following requirement shall be met for acceptance of the components.

1. Smooth motion of trolley on rails over carriage shall be demonstrated end to end
2. Smooth $\pm 180^\circ$ rotation of mast about vertical axis shall be demonstrated
3. Smooth and vertical motion of telescopic mast in its full stroke shall be demonstrated.
4. Smooth $\pm 90^\circ$ rotation of cutter on its axis shall be demonstrated
5. Under water cutting of pipes in vertical, horizontal and inclined orientations by hydraulic shear cutter shall be demonstrated
6. Lifting of cut pipes on floor by cutter and dropping them into storage bins shall be demonstrated.
7. During motion of the system no fouling of cables and hoses shall be observed.
8. No malfunction of hose/cable manoeuvring mechanism shall be observed.
9. No malfunction of cutter, motors, control valves, pressurizing system etc. shall be observed.
10. Cutter shall be able to rigidly hold and lift 1m length of pipe with swivel motor supply switched off and only braking line supply on.
11. No malfunction of limit switches to prevent over-travel of motorised systems shall be observed.
12. All components shall meet dimensional requirement as per drawing.
13. During pressurisation of fluid actuators, no leakage shall be observed.
14. After testing components shall be disassembled and visually inspected for any distortions/dents etc. These shall not be observed on components.

6.10 **Reports:**

The supplier has to submit following reports/ certificates along with the delivery of items

- i) Mill test certificates of all raw materials.
- ii) 100%-dimensional inspection report.
- iii) Shop testing & functional performance reports.

- iv) Certificate of Compliance.
- v) Complete history docket (1 copy) in hard copy as well as soft copy format.

7.0 PACKING AND SHIPMENT

- **Packing**

After completion of all shop tests and acceptance by the purchaser, the assembly shall be thoroughly cleaned, dried, protected from dirt, corrosion and any other damage. Rod cutting gadget shall be supplied with minimum number of subassemblies for final integration at site. Pack the sub-assemblies in wooden boxes so that no damage may happen during transportation. Carbon steel components like frames, structures etc. shall be painted with primer and two coats of good quality enamel paint of color specified by purchaser. The Supplier shall be fully responsible for the proper care and handling of assembly during packing and shipment to ensure their arrival at destination without damage to any part. Items shall be crated suitably and shipped to purchaser's works, RO Zonal Stores, BARC, Mumbai.

- **Delivery:**

Delivery of items shall be made only after obtaining 'shipping release' from purchaser. The components of Rod cutting gadget shall be covered by a Supplier's Transit Insurance during transportation to the place of delivery indicated in the Purchase Order. The items shall be delivered on or before the stipulated delivery period mentioned in Purchase Order.

- **Guarantee / Warrante**

Items shall be guaranteed for a period of 12 months.

8.0 Purchaser's Drawings, Specifications etc.

- **Purpose**

All drawings, specifications etc. that may be furnished to supplier by the purchaser are property of purchaser and are intended to be complementary and to provide for and comprise everything necessary for the completion of works/supply. These are not to be used for any works or performance other than those for which these have been provided and shall be returned to purchaser immediately on completion of work/supply in good condition.

- **Property of purchaser**

If, during the process of execution of the contact, any improvement, refinement or technical changes and modifications are effected by Supplier, such changes shall not affect the title to the property of purchaser and all the information, specifications, drawings etc. including the improvement/ modifications effected by Supplier shall

continue to be the property of purchaser. Supplier shall not have any claim or rights whatsoever in respect of purchaser's drawings, specifications, prototypes etc. even where improvement, refinement, modifications etc. have been effected by Supplier.

- **Confidential Information**

The drawings, specifications, samples and such other information furnished to Supplier relating to the supply/works, sub-system/equipment etc. are to be treated as confidential which shall be held by Supplier in confidence and shall not be divulged, transferred, exchanged, gifted or communicated to any third party without the prior written consent of purchaser. Supplier therefore binds himself, his successors, heirs, executors, administrators, employees and the permitted assignees or such other persons or agents directly or indirectly concerned with the works/supply to the confidential nature of the drawings, specification, prototypes, samples etc.

(LIST OF DELIVERABLES)

SI. No.	DELIVERABLES	QTY.
1.	Rod cutting gadget assembly as per dwg. This includes Rod Cutting Gadget, Hydraulic cutter, water hydraulic Power pack, Electric motor, pneumatic motor, cable drag chain, compact control panel.	1 Assy.
2.	Fasteners used in assembly	50%
3.	Complete history docket in hard copy as well as soft copy format containing mill test certificates, LPT report of welds, 100% dimensional inspection report, drawing alterations, BOC specification & invoice	1 each in softcopy and hardcopy format

* = RTD/RCG/DD

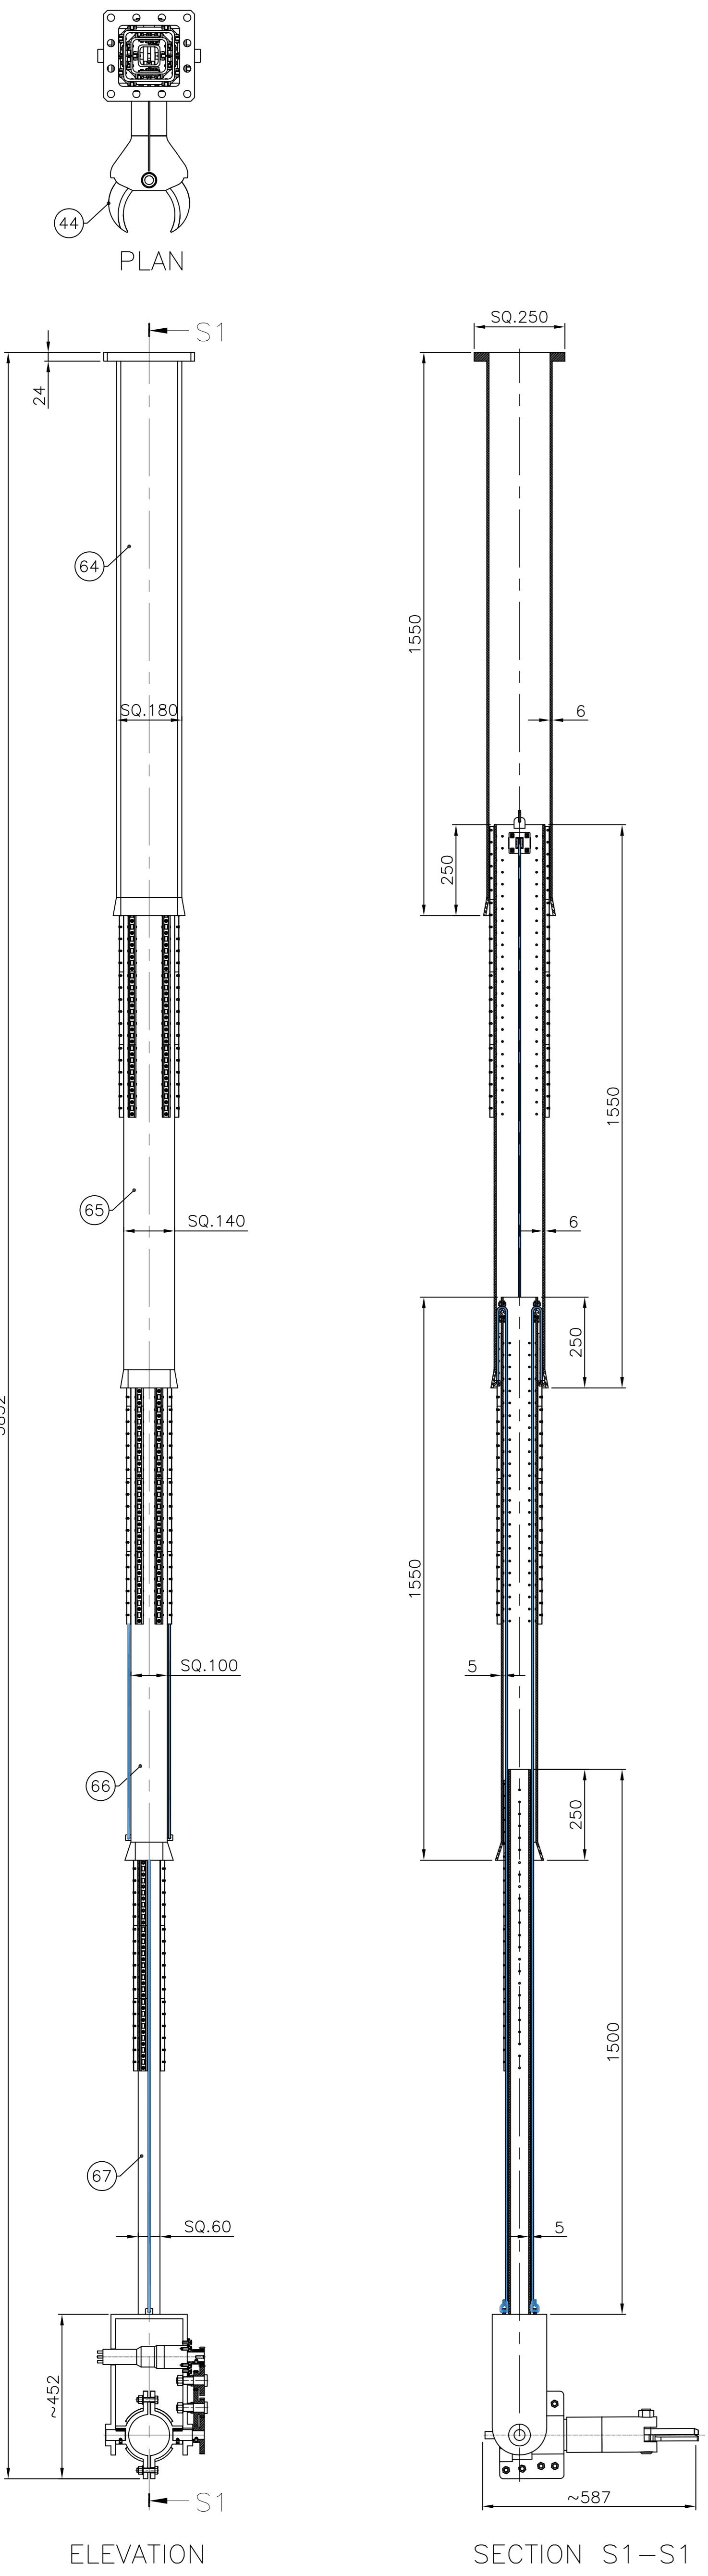

NOTES

1. ALL WELDS SHALL BE INSPECTED BY LPT
 2. APPLY WASHERS FOR ALL FASTENERS
 3. INITIAL LINKS OF CABLE DRAG CHAN SHALL BE SUITABLY FASTENED TO DRIVE HOUSING TUBE (PART NO. 3)
 4. SUITABLE ARRANGEMENT SHALL BE MADE FOR LOCKING TROLLEY AT ANY DESIRED POSITION ON THE DRIVEN CARRIAGE
 5. PROVIDE LIMIT SWITCHES TO AVOID MAST OVERRUN
 6. SUITABLE MANIFOLD BLOCK SHALL BE FITTED TO CHAIN COVER FOR SUPPLYING ALL HOSES PASSING THROUGH CABLE DRAG CHAIN.
 7. PROVIDE A COMPACT CONTROL PANEL FOR OPERATING HYD. CUTTER, AIR MOTOR & ELECTRIC MOTOR. THE PANEL SHALL BE PLACED ON DRIVING CARRIAGE AT SITE
 8. ELECTRICAL CABLES, PNEUMATIC TUBES & HYDRAULIC HOSES OF SUITABLE LENGTH SHALL BE PROVIDED. SUITABLE LAYOUT OF

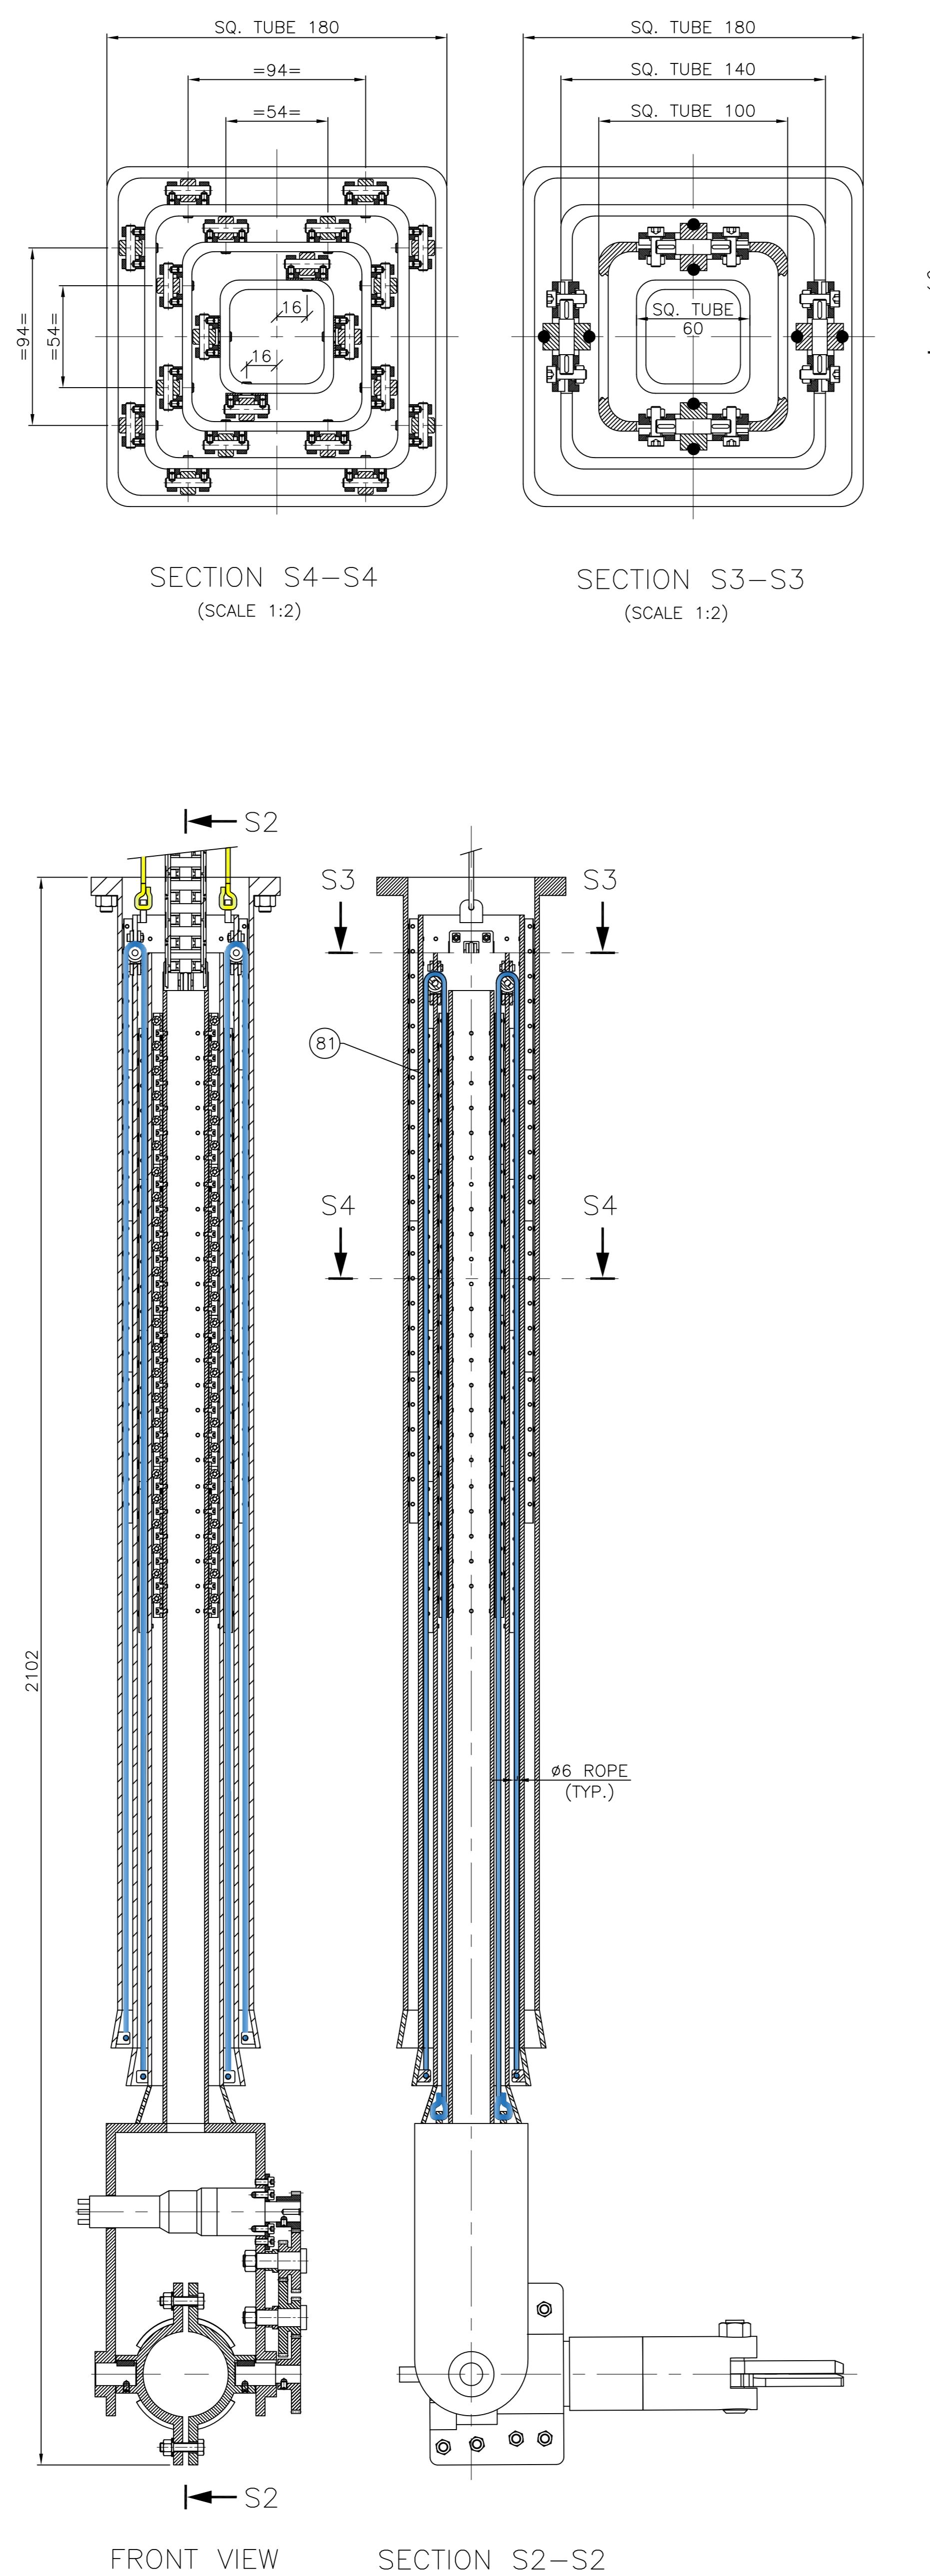

8. ELECTRICAL CABLES, PNEUMATIC TUBES & HYDRAULIC HOSES OF SUITABLE LENGTH SHALL BE PROVIDED. SUITABLE LAYOUT OF CABLES ETC. SHALL BE MADE TO PREVENT JUMBLING OF DURING MOTION OF CARRIAGE & TROLLEY
