

Title : He Leak Detector

- The instrument is primarily useful for the vacuum leak testing of UHV components, chambers, enclosures, vacuum sealings, large experimental facilities etc.
- SALIENT FEATURES
 - Measurement range : $10(-4)$ torr-l/s to $10(-10)$ torr-l/s & $10(-7)$ torr-l/s(sniffer).
 - Response time: ~ 1 sec.
 - Modes of operation: Vacuum, Sniffer.
 - Fully automatic operation.
- APPLICATIONS
 - For leak measurement of vacuum components used in accelerators, analytical instruments, various plants using gaseous system, pressure chambers etc.
- Technology has been transferred to pvt industry.
